

## **Pelasgians ancient forgotten people.**

Dardanus was son of Electra and Zeus according to mythology, Electra was daughter of Atlas and Atlas was son of Japheth. According to the Bible Japheth was son of Noah which survived with his brothers Sam and Ham and it is supposed that from Japheth was created Europeans. Dardanus was founder of ancient Dardanians. After the flood of Ohrid Lake Dardanus went to Arcadia and appointed his son name Idaeus to rule in this region. Dionysius of Halicarnassus (I 61.62) says that the first residence of Dardanians was Arcadia, which ruled together Dardanus and his old brother Lasion, who came after the Atlas son of Noah because Atlas was first king of Arcadia. According to Giuseppe Catapano which deciphered Egyptian papyrus ancient Pelasgians was from Atlantis and then they spread along the Mediterranean. Dardanus married the daughter of Palas (tribe of the flow of Palestinians today) Chrysen and had two sons Idaeus, Mount Ida took his name in Asia Minor and Deimas. When occurred a surge in Lake Ohrid and Prespa, most of Dardanians fled to the island of

Samotrakës (according to Samon of Thrace), a remnant part of Dardanians which stayed in Arkadia, Dardanus appointed king his son Deimas. From Samotrakës then a part of Dardanians emigrated to Asia Minor where he established new settlements because they knew very well the wall-builder craft, while Lasion was hit by lightning in the island Samotrakës from Zeus because he wanted to have relations with Demeter. Dardani as leader of his colony on the Hellespont went. Idea son found a desolate land in Asia Minor that later was called Frigia, and called Mount Ida (I-gave road). Some of these Dardanians continued their pilgrimage to Asia, why is not casual that Indian priests say Alexander the Great that you are the third coming from there because before him, Dardanians with Carians had peregrinate to India this thing underscores the great Aristides Kola, so up there we find traces of the Dardans. In Troy Dardanus was expected by the Trojan king, Teucer who gave his daughter Batea, because Palas daughter was died to Dardanus. Erikthion was born with Batea Kingdom, so he

was most happy men  
because he inherit the  
kingdom of both Dardan  
and troyan king  
Teucer. King Teucer thought  
according to Athenian  
historian Fanodem was  
from Attica. Theukri was  
glad, they had come because  
the country was fertile  
with few people .Trosi was  
Erikthion son, the city of  
Troya takes the name from  
Tros and the people of Troy  
was called by his name  
Troyans ,and Son of Tros  
Ilion was founder of  
legendary Troya.. Në Frigia  
he participated in  
competitions to Frigjët  
pellazge, but all Ilioni  
defeated, and the king  
granted Frigjëve of 50 boys  
and 50 girls and gave a cow  
laramane, and dote on the  
place where it will stop  
cow start Ilioni dardan  
glamorous city of legendary  
Troy. This is the glorious  
history of ancient  
Dardanians who founded Troy  
and "Greek" today is a  
historical fiction that are  
not mentioned at all by  
ancient historians,  
therefore, all mixed up  
with errors historians  
Herodotus and Aristotle,  
the first think that Helens  
are special people because  
it varies by race and  
language connects Aristotle  
mistakenly Graicoi Helena  
with so today we have the  
Greeks invented history  
which is a fiction, because  
all the ancient glory

belongs to the people of  
Homer nor immemorial  
pellazgjëve. Prandaj  
mentions some "Greeks" in  
the Iliad and Odisenë  
because they s'egzistonin.  
bashkëkohanikët called  
Homer as his "Oh" the blind  
man who left fame in the  
history of European  
civilization, Homer was not  
Greek but his tongue was  
the labi Today, even the  
heroes of "Iliadës" and  
"Odisesë" were not Greek,  
they had the blood of our  
ancestors Pelasgians, but  
also established the Trojan  
war from ancient Darbar,  
was not a war between the  
Trojan and Greek, but was  
"ndërpellazgjike war"  
between pellazge tribes  
living in north and south.  
Etnonimi "Greek" was not  
mentioned at all by the  
ancient writers, it was the  
invention of the Romans  
they mistakenly called  
Hellenistic graicoi,  
because in Epirus ruled  
matriarkati or womens ,  
because there was no  
ancient Greek tribe or  
village where the people  
lived, so "Graicoi"  
Aristotle linked with  
Helens who made a mistake  
because Homer mentions the  
"women-woman" because of  
the matriarchal system that  
to Illyrian-pellazgjet,  
hence the major decision-  
making powers that are  
being shaped by Aristotle  
founded heleno-Greek  
ideology which lies at the

core of the modern Greek state, even though all the dignitaries who visited Greece and the Greek revolutionist Peloponnese (Morea), Attica, Eube, Beoti, Thesali, Chameria speak Albanian, but major powers put on the agenda Aristotelian myth and Greece established a 100% Greek language so-called artificial languages that greekishjta Koine became Ptolomeut commandment, that politically the idea Aristeas The institucionalizoi Arvanitasit Elifter Venizelos. parahelene period was ignored because it works mendoheshte Homer "Iliad" and "Odyssey" were poetic fiction from relevant academic circles, while the German archaeologist discovered Hajnril Shlimani Troy in Asia Minor based just on data to give Homer in "Iliad" of Homer's works should therefore be viewed in the framework of history that were codified to pellazgjëve residents of meditaranit immemorial civilization that founded the immemorial "Egjean. Dodona was the religious capital more accurately pellazge "pellazgjite Mecca, there was the oracle, so Strabo said" Thunderer of Dodones pellazgjite ", this period in history known as parahelene dark period for

this period wrote a large number of minds on the brightest of that time as Herodotus, Hesiodi, Strabo, Tukididi, all these were Homeri. Të when talking about Pelasgians but were confused about their origin, especially Greeks, Romans perzmadhuan still mistake that the Greeks called Graecoi in order to pavetëdishme, and during the conflict between Sparta and Athens went some mythology to show superiority of Sparta to Athinasve pellazge. Have increased confusion still more scholars parahelene issue that have not recognized the Albanian language, which says that the Stipcevic A. can not be good scholars of this period that he knows well that the Albanian language, and considering how pellazgjishten "dead language that left traces Skâne", researchers have gabuara. Herodoti conclusions of which was known as the father of history, he spotted "barbarians-pellazgj" by Helena, to "barbarians" were those who flisinin pellazgjisht, therefore it is not coincidence that all serious scholars know that the Albanian language and deal with antiquity pellazgjishtja reach the conclusion that the old can deshifrohet only through the first language that

emerges from the trunk of the languages of the people unreal "indoeuropean" Albanian language. One such conclusion also issued a friend of a prominent rilindasi Konstantin Kristoforidhit with which many traveled through Albanian areas Dr.Georg von Han in his studies on the Albanians made a triangle- ilir-pellazgjë famous shqiptarë.Edhe ilirologu, Prof.. Stipçeviçi reaches the conclusion "that only Albanians are those that preserve language and identity of this very ancient pellazgjo- Illyrian", while pellazgjit, Hesoidi called "Paleoktonos" or people from dust, alleging that our ancestors who were residents pellazgjet most ancient and native to southeastern Europe that inhabited the Balkan peninsula to the Adriatic, the Danube River and Asia vogël.Samiu "mendjendrituri" nickname for rilindasin honor of prominent Ottoman Albania, in his monumental work "Albania which was, what of any place ", writes that from pellazgjëve spilled: Illyrians, Epirote, Macedonians of Ancient Thrace, Dake, Etrur but all of it together a language was barbaric language as it was called Herodotus the language in which pellazgje flow of language

shqiptare.Pellazgjët lived across Greece today, they were deployed in More, so Argosi from the Macedonian dynasty of ancient kings had argeadëve derived from this settlement geography pellazge known that Strabo called "Argosi pellazge" . Mikenä had a civilization was famous from Agamemnon (He was thought) and his brother Monealu (Mind-washed) was king of Sparta, while Arkadia thought to be the residence occupied by the ancient pellazgjët, even during revulucionit "Greek "Random is not arkadia (that is (More) Akeja, Attica, Hydra, species, Beotia says Finleu were inhabited exclusively by Albanians who speak the Albanian language. Therefore Arkadia be thought of ancient settlement with pellazgjeve, in this country thought to have came out so many immigrant dardan Dionysius of Halicarnassus writes during floods that have made Lake Ohrid and Prespa today. Homer does not mention coming up very later in this island is today known as the Peloponnese, as our that Herodotus lived in Athens and is called Pelasgians and later historians invented a science fiction as "Dorian invasion" was not supported by archaeological data, nor that Homer akejtë of pëmend

in Troy not cited as "Greek". Pellazgjit also established an extremely superb civilization on the island of Crete and is known as the Minoan civilization, which alleged the shkatrruan Doric tribes that were pellazgjë who had come from the near east and northern Africa Matthew Aref says were semito-Egyptian origin. An important tribe of operation were from the Palestinians have their origin sotëm.Ajo that has left scars in the history of Western civilization is the Trojan war, which was found by archaeologist famous Hajnrüh Shlimani.Troja was a city founded by the ancient Darbar, who were great workers, that among the first worked iron and forgive those possessing this activity had great achievements, they founded three major cities as Ulpiana, Skupi and Naisusi, Copyright ancient territory coincides with today's Kosovo is today including Sandzak shpopulluan Nis that barbaric Serbs after the Russo-Turkish wars of 1877-1878. migronte The ancient people towards the east, according to legends: dardanusi Troy son of Zeus established, pellazgjët were city-builder, so the Indian priests say Alexander the great "that you are coming from third

place (pellazgjia), it takes understanding for the predecessor of Alexander the Great had passed that way earlier than he, so he followed the path of the first to tij.Prijami (leader) was king of Troy dardan, also took the name Dardanelles straits to testify on the origin of ancient benorëve epic dardan this city.

Ndërpellazgjike the Trojan War between pellazge akejve and Darbar.

In Troy became a great war between tribes pellazge ten years, even though mythology says that this fight was made because of the beautiful wife Helenës king spartjan Monelaut, it became a war for dominance as the Peloponnesian War that took place between of Sparta and Athens because Troy was a city very rich and well designed for good vocational njihinin dardania of the murëndertuesit, the walls of Athens are built from pellazgjëve therefore a part of the city known as "Pelazgikon" even in time of Roman occupation .

Odysseus in aën of akejve lumpy, which The leading center for shrewdness and craftiness in the Trojan war.In that battle was a leading center

of a brave warrior tribes  
pellazgje mirmidonase,  
Akili (so easily) he had  
the nickname (aspeti =  
swift) who kills son  
Priamit,  
Hektorin. Agamemnoni was  
king from Mikena, a city in  
which pellazgjit mikenas up  
famous civilization for  
which all writers write  
Aegean period. Homer is  
thought to have written in  
VIII century BC, although  
his works are meant to be  
fiction Homeric, the  
discovery of Troy by German  
archaeologist Hajnrih  
Shlimanit certifies that  
works Homer is a codified  
history of the ancient  
period before AD when  
pellazgjit gave this  
civilization has  
egjean. Prandaj civilization  
in Crete where the trail  
was developed civilization  
Minoas, Mikenë, Troy,  
Vince, where are found  
inscriptions of around 5000  
years BC It is not casual  
that rhapsody "homeric" is  
still alive in the Albanian  
folk music genre in the  
form of the song where  
këndohet and followed from  
generation to generation  
the glorious history of  
epic heroes shqiptar. Enea a  
brave soldier from Troy and  
Trojan migron leaves in  
Italic peninsula where Rome  
establishes today, so  
Aeneas founded the ancient  
city of ancient Butrint,  
whose ruins are located  
today near Sarande the

southern coast of the sea  
Jonë. Pellazgjët who settled  
in the Italic peninsula  
were called Etrur that  
called Etruscan Roman and  
"Tusk", but when they went  
there and lived there other  
tribes as Messapii pellazge  
V., ... .. their language  
managed to decipher,  
scholar Zacharia Mayani  
France, Nermin Vlora  
Fallaski (daughter of  
Ismail Qemali great patriot  
who placed the foundations  
of " Albania London (1913).  
Headings found in Crete,  
Lemnos, Vince were  
completely identical with  
Etruscan writing, so this  
is a proof that they all  
were pellazgj, but other  
testimony today is that  
Albanians live in countries  
where grandparents lived  
their immemorial: Albania,  
Kosovo, Greece, Macedonia,  
Turkey, Italy  
Croatia, fossil  
Bosnjë. Andaj best  
civilization egjean  
announced as the "dead" by  
many researchers that light  
is the Albanian language is  
not coincidence that the  
Albanian language is the  
language of the first tree  
that comes from Indo-  
European languages, while  
people "indoeuropeanet" is  
science fiction, because  
the root of all languages  
is definitely  
pellazgjishtja, and  
elements of this language  
we encounter in many  
European languages, and

they had their own alphabet  
alphabet discovered by  
Evans Linear B and A. For  
civilization spoke egjean  
all ancient writers as  
Diodori, Herodotus,  
Euripides, Hesoidi,  
Virgjili, Homer, Strabo,  
Pausani .. tjerë. Edhe why  
many Greeks tried to  
understand all this  
civilization, Helene Homer  
mentions as tribe or hand  
while (hand), our (our)  
also eolët (money) which  
the Greeks (of today) have  
been assumed that three  
Greek tribes did not  
mention at all, even  
Herodotus says that most  
Athenians were Pelasgians  
who speak Hellenic  
language, while not  
mentioned at all Greeks.  
Graeci related later  
Hellenistic Romans without  
awareness, this link  
graeci-Hellenic served to  
close çesthjen  
pellazge. Ndersa mistakenly  
served with a Greek myth  
about helenin son Priamit  
that brought in Epirus as a  
slave and Dori Akili  
Mirmidonas mentioned as the  
son of Helenit but the fact  
that son was Heleni del  
Priamit that was dardan  
origin.  
Other origins of doreve  
thought to be  
Semito-egjyptase that tries  
to deny Tukididi entirely,  
so the Greeks background is  
very dark, for periods of  
people denied  
parahelen. Ndersa Robert

D'Angely  
Says: Helen was called  
pellazgians who speak  
dialect helenishten was  
pellazge jonisht language.  
For Our people were  
pellazge Herodotus says,  
and were founders of  
Athens, so the tribes Tezeu  
Kola A. Lape that connects  
with the tribes mentioned  
as founding Labe XIII  
century BC Athens and even  
the city walls were built  
of Pelasgians whom knew the  
murëndertuesit vocational  
and called Justin who  
referred pelazgikon. Sipas  
ancient historians says  
that: "Macedonia formerly  
called EMATIA (Kingdom)  
under the name of king  
EMATION "Great JONE", its  
people while the country  
was called pellazge Pajoni  
", while the late 'King  
Pajoninë the lead Pellagoni  
(Offspring Joni), while"  
the brightest "Sami thinks  
Frashëri (Pellagonia -  
Pleqësia), the king  
mentioned in the battle  
Trojës. Prandaj legend "of  
the ancient Macedonians"  
were some pellazgjité and  
speak pellazgjishten,  
Strabo said that the  
population of Macedonia,  
Epirus and Illyria speak  
the same language, even the  
hair of waiting in the same  
way, have the same customs,  
and governance by assembly  
of elders which call  
Plakonia, the elders say  
Plaixh while Plaixhe old,  
distinguished from Helena

to jonishte written language. R.S.P. Beekes professor of comparative linguistic indoeuropiane says: morphological analysis of word makos (dorisht) and "dnos" indoeuropiane is epamundur language, so he "Makedhonia" considers the etymology parahelene, ie the whole dynasty of pellazgjike. E words were at odds Argeadëve with Helena (pellazge), especially Philip II and Alexander the great who underwent Hellenic relevant policy, as soldiers who did not take them because s'iu believe the difference is that while keeping the language ancient Macedonians and the ancient tradition pellazgjëve Bronze period, Helena were pellazgjë who had taken Phoenician alphabet and speak helenishten old. Sllavobullgarët of today who claim to be "the ancient Macedonians, who appeared after the year 2000, and that instead of pellazgjishtes speak dialect with bullgarishtes Serbian elements produced as a Serbian agent Blaze Koneski (Blagoja Oran Lyameviç) çetniku nephew of a Serb, the ultranationalist Serbian educated center in Kragujevac with a scholarship from King A. Karadjordjevic and Harvard sllavisti known Horace Land

that was invited by Harvard to establish the first grammar of the language "Macedonian" after the second war botërore. Historia of this "new nation" included in the VMRO-revolucionarët, which were genuine atdhetarë Bulgarian Bulgarian stated that fought against Serb propaganda and Macedonia remained under Ottoman Empire by the Congress of Berlin to bashkangjesin mëmës Bulgaria. Official version of the "Macedonian history" admits the irony of fate only Akademia Albanian science, which avoids a really historic colonial state that was established on the territories of ethnic Albania, Yugoslavia gllabëroi For a large part of the Albanian territories, which were given during the Congress of Berlin (1878) and London (1913), at least "academic" Skåne stay Albanian nor antiquity nor modern history on the issue of Albanians living in former projects Jugosllavi. Prandaj these were purely Serbian colonial policy . Later this nation created during Asnom Pçinski Pcinski it in 1944 adopted as symbols pellazgje using sun-star on exactly pellazgjët old symbol of gods Molossians pellazgjite. Prandaj observed a total variance,

a total diskontinuitet historical, so it is difficult to obey this people serious historians that their identity devijoi genuine Slav-Bulgarian was also infiltruan in Serbian Vlachs, Montenegrins, Gorani, etc. ... tërbesh League this Slavic-Bulgarian people of ancient Macedonia pellazgjike made royal academy of sciences among the zëshmit Serbian: Jovan Cvijiçi, but the father of Alexander Bjeliçi "Maqedonizimit idea" is Novakoviçi Stojan kryeatar was as royal academy of sciences of Serbia 1906-1915 ", whose idea of institucionalizoi, communist party Yugoslav and that went "Macedonia today" without any connection with the ancient Macedonians did this pellazgje.Serbët about to benefit from the relationship established between the major powers and Bulgaria in Berlin congress happened as response to the signing of the Treaty of St. Stephen to reduce Russian influence in ballkan.Prandaj this idea was designed by Serbian academics for colonial purposes, which had the aim of expanding Serbian territories, under the "Garashinian" that was a vision to coincide with the Kingdom created by Stefan Dushanit . Therefore the connection with ancient

Macedonia is political fiction colonial purposes, Serbia to settle areas of the ancient Dardania and Pajonisë Illyrian serbisë.Prandaj south of this distortion of reality that makes Serbs colonists that its population in large percentage Illyrians were assimilated into the Serbian body model tribal County is in imitation of tribal body of the Illyrians who lived up to the Danube River, so with that best testify pellazge inscriptions found in 5000 years BC Vince belonging pellazgjike civilization. The romantic myth of the Kosovo battle (1389) runs counter to all serious historians, lived up to the Danube River dardane, most of them assimilated, and Nis the whole Sandzak shpopulluan after Russo-Turkish war (1877-1878) that exclusively occupied by Albanians, which is known as Nishi has been important city of ancient Dardanise Naisusi, Romans made the capital of Dardania, Serbs state population increased at the expense of the population therefore dardane origin of many Serbs. Even many Roman emperors who had originally Illyrian and play major role in survival of the empire were of Smirnes (Mitrovica Srem), (Singidunum) Belgrade today, Dardania, Dalmatia,

etc. .. eg: big Constantine was dardan of Nis, Dikleciani was Salonës Dalmatian city of Split close of today, Justinian was of Tauresiumit in Skopje today that was also iliro - dardan ie all these landscapes banoheshin of Illyrian-pellazgeve. Nëse made genetic analysis Albanian appear such as: Bojkoviç-Bujku, Djukanovic-Gjuka, Djindjic-Gjinaj, Kraishnik-Kreshnik etc. .. also the territory where they reside today was Illyrian - pellazgjike that the genocide through their lands transferred by the stërgjyshore. Vetë dynasty Nemanjiçëve embryos that have established the first Serbian state was under Prof. S. Isovici Nimani family who lived in the district of Prizren so it asserts a Serbian pop Albanian origin, but Stefan Dushanit had studied in FC, so he brought laws were similar to the Kanun of Leke DUGAGJINI, Albanian tribe were Vasojeviqët Montenegrin tribe is derived from S. Milosevic and Arkan, Vasojeviqët Albanian tribe were originally from Hoti this proves researcher Spiro Kulisaqi and Edith Durham, as that was Arvanites Elifter Vanizelos Aristidh Kola said the sight of "antishqiptarizëm", so he said keqkuptua F. Konica when "God save us from

Albania Albanians" and "Albania will become the ire of the Albanians". Therefore dardane ancient history is interesting, Dardania were more advanced people they knew to edit ancient metal, were good farmers to cultivate wheat, corn and even the Albanians thanks to this feature was called Arba (field-made) then arvanit, Arnaout etc. .. Copyright pellazgjite that shtriheshte on Pajoni (shtriheshte that today's Macedonia), so Darbar were "city builders" because they were also good bricklayer, not in vain even as Dardanusi mythology was Zeus and son Elektrës and brother of Harmony, women and Jassionias Kadmi related to the cultivation of wheat and grain worship.

Alexander the Great

Dardania known as builders of so many cities were called as "Poliarkis" this feature had the great Alexander who won the third Darin Persian king not to be emperor, but to build cities and to spread civilization, with What he also leaves his father's concept of Philip II was an ambitious king and had the concept of babilonasve that lead oligarkik dynasty Akamenidëve (leading

dynasty of the Persians), for this reason Aristotle accuses Kalisteni nephew, and this was the moment when Alexander acarohen great relationship with Aristotle, because Kalisteni punished by Alexander because Alexander doubts about conspiracies against him and prepared his case such as Filotës son Parmenionit (General Alexander great), but also Roksana wife, and mother of Alexander Olympia allegations of a plot of charge to Aristotle and General Antipatrit responsible in Macedonia which has data that may have been Aleksandrit.Mbase biological father was the reason that Aristotle pellazge Stragira prepared with Antipatrin of Alexander the great plot to which The poisoned so says the ancient historian Arijani.Leka great këshillohej of Plato's academy, so he addressed the Macedonian phalanx to which the ancient historian Justin pellazge were clean and that his army consisted mainly of Illyrian tribes, and only 600 Greeks Epirote who turned Alexander the subject and believed, while the Persian army with 30 000 soldiers dispononte mercenaries led helenë.Aleksandri great "pellazgjëve alliance" because his soldiers were were the Illyrians,

Macedonians, Thrace, the mother came Epirote from Olympia girls the king of connectivity Molossians Neoptolemi, so maternal language of Alexander was speaking and writing language that Homer, and that all the tribes speak as Molossians Epirote, Kaon, then Albanian Thesprotia, while his Frymëzuesi was his famous uncle from which flowed neoptolemenjëve dynasty of "kings of Epirus" according Plutarkut, "Akili" mirmidonas, the hero of the Trojan battlefield hero with whom Alexander was recognized in childhood because he was under his stay jastekun major works of Homer "Iliad", so his soldiers flisinin all of their maternal language pellazgjishten, and Alexander was somewhat more vulnerable when his maternal language nençmohej "pellazgjishtja" ancient historians write so even though at that time was the most popular helenishtja golden period of Athens, which occurred about 500 years -400 BC which preceded the famous reforms lawmakers Sollonit, Athens became a center of culture and that was in vogue to called cultured Then those flisinin this language, while the "barbaric" those who speak pellazgjishten, so in this context Herodotus pellazgjit calls

barbaric, while the number of so-called "Helena" by shkrrija increase the adoption pellazgjëve the exact language of the Hellenistic pellazgjëve so Herodotus writes in his work "The History of Herodotus" when speaking about the origins of the golden period Athinasve.Kjo Athens shkatrroi lasted until the Peloponnesian War (moresë) that happened between Athens and Sparta, namely driven by the tendency of educated Perikleut of sofistëve that link to delos konfederale empire to turn in control of Athens
